MONEY.PUMP

Fast Money. Instant Pump.

Official Whitepaper

Launched on Pump.fun

Version 1.0 • August 2026

Money.Pump is a high-velocity Solana meme token built for one purpose: turning early conviction into rapid gains. No complicated utility. No empty promises. Just pure pump energy on the fastest chain.

1. Introduction

In the world of meme coins, speed is everything. The difference between life-changing gains and watching from the sidelines often comes down to timing and narrative. Money.Pump was created for traders who understand this reality.

Money.Pump is a community-driven token launched fairly on Pump.fun. It exists to capture momentum, reward early believers, and deliver the purest form of degen entertainment — watching the chart go vertical.

This whitepaper outlines the vision, structure, and simple mechanics behind Money.Pump. There is no complex technology to understand. There is only the pump.

2. Vision

To become the go-to high-speed meme token on Solana for traders seeking fast money opportunities. Money.Pump aims to create a strong, loyal community that moves together, pumps together, and celebrates wins together.

Core Principles:

- **Speed** — Everything moves fast. Decisions, pumps, and community action.
- **Transparency** — Fair launch. No team allocation. No hidden wallets.
- **Community First** — The holders are the project. Narratives are driven by the people.
- **Pure Fun** — Crypto should be exciting. Money.Pump keeps it that way.

3. The Problem

Most meme coins overcomplicate things. They promise utility that never arrives, roadmaps that get abandoned, and "revolutionary" technology that amounts to nothing. Meanwhile, retail traders just want one thing: a fair shot at catching a real pump.

Too many launches are controlled by insiders. Too many charts die before they ever live. Traders are tired of delayed gratification and broken promises.

4. The Solution — Money.Pump

Money.Pump strips everything back to the essentials. Fair launch on Pump.fun. Immediate tradability. Zero team tokens. Maximum community ownership. The chart speaks for itself.

If you buy early and the community shows up, the money moves fast. That is the entire thesis.

5. Tokenomics

Money.Pump follows a classic Pump.fun fair-launch structure. There is no private sale, no presale, and no team allocation. 100% of the supply is available on the bonding curve from the moment of launch.

Parameter	Details
Token Name	Money.Pump
Ticker	MONEY (or custom)
Chain	Solana
Launch Platform	Pump.fun
Total Supply	1,000,000,000
Team Allocation	0%
Presale / Private Sale	None
Liquidity	Auto-migrated to Raydium on graduation
Tax	0% Buy / 0% Sell

Once the bonding curve is filled, liquidity is automatically migrated to Raydium and locked, ensuring a clean transition to the open market.

6. Roadmap

Phase 1 — Launch

- Fair launch on Pump.fun
- Community formation and initial momentum
- Organic marketing and viral content push

Phase 2 — Graduation

- Bonding curve completion
- Automatic migration to Raydium
- Liquidity locked
- Expanded social presence and influencer outreach

Phase 3 — Expansion

- Community contests and reward campaigns
- Memes, raids, and coordinated narrative pushes
- Potential CEX listings driven by volume and demand

• Continuous community-led development of culture and brand

7. How to Buy

1. Download a Solana wallet (Phantom, Solflare, or Backpack recommended).
2. Fund your wallet with SOL.
3. Go to Pump.fun and search for Money.Pump (or use the official contract address).
4. Connect your wallet and buy on the bonding curve.
5. After graduation, trade freely on Raydium or supported aggregators.

Always verify the official contract address through community channels before purchasing. Never share your seed phrase.

8. Community

Money.Pump is nothing without its holders. The community is the engine. Strong narratives, consistent presence, and collective energy are what separate short-lived coins from memorable ones.

Join the conversation, create content, raid, and help push the story forward. The faster the community moves, the faster the money moves.

9. Disclaimer

Money.Pump is a meme token created purely for entertainment and speculative purposes. It has no intrinsic value, no formal team, and no guarantee of future performance. Cryptocurrency trading involves substantial risk of loss and is not suitable for every investor.

This document does not constitute financial advice, an offer to sell, or a solicitation to buy any securities or tokens. Always do your own research (DYOR). Never invest more than you can afford to lose. Past performance is not indicative of future results.

By purchasing or interacting with Money.Pump, you acknowledge that you understand the risks involved and accept full responsibility for your own decisions.

Buy Early. Move Fast. Pump Hard.
